Designed with heavy gauge steel flat bar for stability.

Conventional vs. Pushbarrow

Features

- The ergonomically designed Push Barrow is constructed to be tough, efficient and safe.
- Lifting the Push Barrow is easy and it eliminates awkward body posture as it is ergonomically designed for maneuverability.
- The 3-wheeled Push Barrow helps you to save time and increases productivity by eliminating workers' fatigue.
- The Push Barrow requires only a light motion to engage and disengage the lock function. The makes the job less stressful and exertions on the body are kept to a safe level.
- The Push Barrow with its Push handle and locking mechanism redesigns the job by increasing productivity and reducing work related injuries.
